Our World: A Geographic Investigation

Unit Seven Standards

"AFRICA SOUTH OF THE SAHARA" {SUB-SAHARAN AFRICA}

Here's what we will work together to explore, understand, and be able to do in this unit:

1. Locate, label, and identify, on a regional map, the main physical and political features of 'Africa South of the Sahara'.
(See cartography application activity = 'regional mapping' = for specific requirements)
2. Describe the geographic characteristics of Africa South of the Sahara.
3. Evaluate the various resources found in the region and discuss the importance of trade for the early kingdoms of Africa South of the Sahara.
4. Assess the effects of the slave trade on the history of Sub-Saharan Africa.
5. Define oral history and explain why it was such a strong tradition among many of the societies of Africa South of the Sahara.
6. Discuss why European countries were so interested in acquiring colonies in Sub-Saharan Africa during the 19th century.
7. Explain the purpose of the Berlin Conference of 1884 and analyze the lasting impacts of this event on Africa.
8. Evaluate the ethnic, cultural, and religious diversity found throughout the region of Sub-Saharan Africa.
9. Discuss the main ways people of the region make a living, the types of transportation and communication facilities available, and the locations where most of the people within the region of Africa South of the Sahara live.
10. Analyze one of the most challenging issues within the region-- the conflict over whether to enlarge farming lands or to use available land for preserving the dwindling wildlife populations of Africa.
11. Identify and explain the "critical issues" challenging the region of Sub-Saharan Africa.

BRIGHT IDEA!

= A suggested study and organizational technique...
At the conclusion of every unit, students should staple all unit work to the unit standards/calendar, resulting in a final exam study guide, as well as a complete semester portfolio entry.
